At this time in history, all woodies are special and unique. This two and a half year project presents a sleek blend of the old and new. The car was purchased from Wes at WoodiesUSA and was in very good but a little tired condition. The sheet metal and frame, etc were perfect but new, upgraded technology and overall driving experience were desired and a complete restoration was begun. To keep things simple here is a list of some of the many things accomplished: complete new wiring with a Painless wiring harness and

switchover to 12 volt with alternator; professional show quality paint (there is NO bondo or rust whatsoever on the car); Chevrolet 350 cu in 330 hp crate engine (Vortex heads); stainless steel headers by Hooker; a completely remanufactured Chevrolet 700r4 transmission, a brand new 9-inch Ford heavy duty rear end and axle by Master Power; all new disc brakes by Master Power; complete air conditioning system by Vintage Air with under dash controls; complete new gorgeous custom upholstery over the original seat frames done with plush naugahyde and tweed inserts on all seats, doors and side walls; the headliner is done in rich, durable, cleanable naugahyde; the entire car is carpeted in a beautiful brown German square weave carpeting; absolutely stunning, eye-popping custom hand-painted wood grain dash, all interior window frame and the outside of the upper and lower back tailgate; complete new chrome over the original grill and bumpers; sound insulation in roof and sides of car; all brand new exterior wood purchased from Doug Carr (hardwoods) and Rick Mack (mahogany panels); complete new slightly-tinted custom glass with single beveled windshield for total forward visibility; new radial tires; new Ididit aluminum tilt steering column; new GM turn signals; new genuine rosewood steering wheel; new seat belts and new stock steel powder-coated wheels (have fun choosing your own custom wheel look!).
